Advantages:

1. Easy application
2. Low odour
3. No build- up
4. Excellent release properties
5. Excellent surface

Application:

Dilute the product with a solvent to a suitable solid content. Naphtha and heptane are recommended. Generally it can be diluted by adding 10-30 parts of solvent. Thoroughly clean the mold surface. Apply at least two uniform, thin coats at process temperature. Allow a short drying time. Reapply a light coat at process temperature when required to maintain desired release and lubrication.

Handling precautions:

For industrial use only. Prolonged skin contact with high concentrate dilutions should be avoided. Accidental splashes in the eye should be washed out with copious amounts of water. Do not allow product to freeze.

Warehousing and logistics

It has nearly 5,000 square meters of cargo storage area. Eight employees work full-time in warehousing.
