

Professional Technical Solutions and Services for Shoe Sole Release Agent

Our Product Introduction

for more products please visit us on shlorechem.com

Basic Information

- Place of Origin: China
- Brand Name: Lubekote
- Model Number: Lubekote 9129E
- Minimum Order Quantity: None
- Price: negotiation
- Packaging Details: 25L, 200L
- Delivery Time: 5-15 working days
- Payment Terms: T/T
- Supply Ability: 20T/week

Product Specification

- Brand Names: Lubekote
- Product Code: 9129E
- Colour: Clear
- Status: Liquid
- Shelf Life: 24 Months
- Density: 0,96-1,00 G/cm³
- Type: Solvent Concentrate
- Application: Demolding For PU Shoe Sole
- Highlight: **Professional Shoe Sole Release Agent ,
Technical Shoe Sole Release Agent**

Product Description

Professional Technical Solutions and Services for Shoe Sole Release Agent

Product Description:

Lubekote 9129 is a lubricant and release system designed for polyurethane industry. Lubekote 9129 has shown excellent performance in releasing polyurethane rollers and castors. Lubekote 9129 is a concentrate. It can be diluted with solvent.

One of the primary advantages of the Lubekote 9129 PU Mold Release Agent is that it is incredibly easy to apply. This is due to the fact that it is a solvent-based concentrate, which means that it can be diluted with ease. As a result, it can be applied quickly and easily to the surface of the mold, ensuring that it provides excellent release properties.

Overall, the Lubekote 9129 PU Mold Release Agent is an excellent product for anyone who needs a high-quality shoe sole release spray. It is easy to apply, has a low odour, prevents build-up, provides excellent release properties, and creates an excellent surface finish. With two different package sizes available, it is a versatile and reliable product that is perfect for use in a wide range of production environments.

Features:

Product Name: PU Mold Release Agent
Package: 20L/200L
Type: Solvent Base Concentrate
Shoe sole demolding agent
High dilution
Easy to use
No build-up

Technical Parameters:

Technical Parameter	Description
Product code	Lubekote 9129
Density	0.96-1.00 G/cm ³
Appearance	Clear liquid
Brand Name	Lubekote
Handling Precautions	For industrial use only. Prolonged skin contact with high concentrate dilutions should be avoided. Accidental splashes in the eye should be washed out with copious amounts of water. Do not allow product to freeze.
Product Category	PU Mold Release Agent
Package	20L/200L
Colour	Clear

Applications:

1. Prepare the product by diluting it with a suitable solvent to achieve the desired solid content. We recommend using naphtha or heptane as solvents.
2. The typical dilution ratio is adding 10-30 parts of solvent to the product. Adjust the ratio based on your specific requirements.
3. Ensure the mold surface is thoroughly cleaned before applying the release agent.
4. Apply at least two thin and even coats of the release agent onto the mold surface while it is at the process temperature.
5. Allow a short drying time for the applied coats to set.
6. If necessary, reapply a light coat of the release agent at the process temperature to maintain the desired level of release and

lubrication.

Support and Services:

The PU Mold Release Agent is a specialized product designed to aid in the release of polyurethane products from their molds. Our technical support and services include:

Technical guidance on product usage and application

Recommendations for optimal mold release performance

Assistance with resolving common mold release issues

Product testing and evaluation

Customized solutions tailored to specific customer needs

Our team of experts is dedicated to providing the highest level of support to ensure successful and efficient use of our PU Mold Release Agent.

Packing and Shipping:

The product is available in two different package sizes: a 20-liter option and a larger 200-liter option.

FAQ:
