

## Water Based Rubber Mold Release Agent Liquid Form For PCR Tires Demolding

Our Product Introduction

for more products please visit us on [shlorechem.com](http://shlorechem.com)

### Basic Information

- Place of Origin: China
- Brand Name: Lubekote
- Model Number: 9502A/9503A/9165C
- Minimum Order Quantity: None
- Price: 1-99 usd
- Packaging Details: 25L, 200L
- Supply Ability: 20T/month

### Product Specification

- Solubility: Soluble In Water
- Form: Liquid
- Shelf Life: 1 Years
- Product Type: Release Agent
- Safety: Non-Toxic
- Storage: Sealed Storage
- Clean Up: Water
- Color: Transparent/white
- Highlight: **Liquid Form PCR Tires Release Agent ,  
PCR Tire Rubber Mold Release Agent ,  
PCR Tires Demolding Release Agent**

## Product Description

### Water Based Rubber Mold Release Agent Liquid Form for PCR Tires

#### Product Description:

Tire Release Agent is a rubber mold release agent that provides superior non-stick performance for tire and rubber molds. This product is specially formulated to provide excellent surface release properties for difficult molding applications. The Tire Release Agent has a mild odor, is soluble in water, and is easy to clean up with water. It has a shelf life of one year and is perfect for use in a variety of rubber, tire, and molding applications. With Tire Release Agent, you can ensure that your tires and rubber molds are released quickly and easily, making your production process more efficient and cost effective.

#### Features:

Product Name: **Tire Release Agent**

Form: **Liquid**

Storage: **Sealed Storage**

Odor: **Mild**

Clean Up: **Water**

Shelf Life: **1 Year**

Purpose: **Tire Mold Release Agent, Tyre Release Agent, Release Agents for Tire Molding**

#### Technical Parameters:

Product Type	Release Agent
Application	Tire Mold Release
Product Name	Tire Release Agent
Shelf Life	1 Years
Form	Liquid
Safety	Non-Toxic
Color	Transparent/white
Odor	Mild
Storage	Sealed Storage
Clean Up	Water

#### Applications:

Lubekote 9502A/9503A/9165C Tire Release Agent

Lubekote 9502A/9503A/9165C Tire Release Agent is a professional tire mold release agent designed for tire release applications. The liquid form and transparent/white color make it ideal for use in tire molding processes. It is formulated from premium quality ingredients to provide superior release performance and low staining on tire molds. This product is non-toxic and safe to use in tire molding processes. Lubekote 9502A/9503A/9165C Tire Release Agent provides excellent release performance and superior tire surface finish. It is specifically designed for tire molding applications and provides superior adhesion and tire mold release. It is perfect for use on natural rubber, synthetic rubber, and other elastomers. It is easy to apply and can be used in a variety of tire molding applications. This product is also suitable for use in sealed storage and is formulated to provide long-term protection against rust and corrosion.

Lubekote 9502A/9503A/9165C Tire Release Agent is the perfect choice for tire molding processes. It provides excellent release performance and superior tire surface finish. It is specifically designed for tire molding applications and provides superior adhesion and tire mold release. It is non-toxic and safe to use and is suitable for use in sealed storage. This product is the perfect solution for tire mold release agents for tire molding.

#### Packing and Shipping:

Packaging and Shipping of Tire Release Agent

Tire Release Agent is shipped in a sealed container to ensure that the product remains safe and secure during shipment.

The product is packaged in a sturdy cardboard box with a protective plastic wrap. The box is labeled with the product name and barcode.

The product is shipped via standard ground shipping or overnight courier services, depending on the customer's preference.

#### FAQ:

**Q: What is the Brand Name of Tire Release Agent?**

A: The Brand Name of Tire Release Agent is Lubekote.

**Q: What is the Model Number of Tire Release Agent?**

A: The Model Number of Tire Release Agent is 9502A/9503A/9165C.

**Q: Where is the Tire Release Agent manufactured?**

A: The Tire Release Agent is manufactured in China.

**Q: What is the Tire Release Agent used for?**

A: Tire Release Agent can be used for improving tire release from tire molds, reducing waste and increasing productivity in the tire manufacturing process.

**Q: What are the advantages of using Tire Release Agent?**

A: Tire Release Agent can reduce the time and pressure required for demolding, reduce tire marking and sticking, and improve tire surface finish.
