

Long Lasting Rubber Mold Release Agent Liquid Form 20L Or 200L Container Packaging

Our Product Introduction

for more products please visit us on shlorechem.com

Basic Information

- Place of Origin: China
- Brand Name: Lubekote
- Model Number: xxxx
- Minimum Order Quantity: None
- Price: 0-99usd
- Packaging Details: 20L, 200L
- Delivery Time: 10-15 working days
- Payment Terms: T/T
- Supply Ability: 20T/month

Product Specification

- Type: Rubber Release Agent
- Compatibility: Compatible With Most Rubber Materials
- Advantages: Minimum Build Up
- Chemical Resistance: Excellent
- Package: 20L, 200L
- Product Form: Liquid
- Storage Conditions: Store In A Cool, Dry Place
- Highlight: **Long Lasting Rubber Mold Release Agent ,
200L Mould Release Agent For Rubber ,
20L Packaging Rubber Release Agents**

Product Description

Product Description:

The Rubber Mold Release Agent is a premium-quality solution designed to cater to the needs of the rubber and molding industries. This product stands out with its environmental-friendly feature, ensuring that its usage and disposal align with eco-conscious practices and minimize environmental impact. As an anti-vibration mold release agent, it is specifically formulated to tackle the challenges of releasing molded parts from their patterns, providing a clean and efficient demolding process that greatly reduces the need for post-molding clean-up and preparation.

Available in convenient 20L and 200L packaging options, this rubber mold release agent is designed to service operations of all scales, from small workshops to large industrial facilities. The product's packaging is also designed with user convenience and storage efficiency in mind, ensuring that the agent remains uncontaminated and retains its efficacy over extended periods of storage.

When it comes to chemical resistance, this rubber mold release agent boasts excellent properties. Its robust formulation is resistant to a wide range of chemicals, making it an ideal choice for use in environments where harsh substances are present. This level of chemical resistance ensures that the release agent will continue to perform optimally even in the most demanding of conditions, providing consistent results every time.

As a type-specific release agent for silicone rubber, this product ensures that the unique properties of silicone molds are catered for. Silicone rubber molds require a specialized release agent that can maintain the integrity of the mold surface while ensuring a perfect release. This rubber mold release agent is engineered to meet these requirements, providing a seamless release without compromising the quality or detail of the molded parts.

Features:

Product Name: Rubber Mold Release Agent

Product Form: Liquid

Package: Available in 20L and 200L containers

Advantages: Ensures Minimum Build Up

Type: High Dilution Rubber Release Agent

Specialty: Rubber Mold Release Agents

Storage Conditions: Store In A Cool, Dry Place

Technical Parameters:

Attribute	Details
Package	20L, 200L
Feature	Dilutable
Advantages	Minimum Build Up
Storage Conditions	Store In A Cool, Dry Place
Compatibility	Compatible With Most Rubber Materials
Chemical Resistance	Excellent

Type	Rubber Release Agent
Product Form	Liquid

Applications:

The Lubekote Model xxxx, originating from China, stands as a paramount solution in the realm of rubber manufacturing and molding processes. With its impeccable chemical resistance and environmental-friendly composition, this high dilution rubber release agent has been specially formulated to meet the rigorous demands of the industry. Available in both 20L and 200L packaging, this liquid release agent is designed for efficiency and ease of use in various production scales.

One of the primary application occasions for the Lubekote Model xxxx is in the automotive industry, where precision and reliability are of utmost importance. Manufacturers of car tires, seals, and gaskets frequently employ this semi-permanent rubber mold release agent to ensure flawless demolding of components, which is vital for maintaining high-quality standards. Its exceptional compatibility with most rubber materials makes it an indispensable asset in the production of automotive parts that require strict adherence to tolerances and shapes.

In the aerospace sector, the Lubekote Model xxxx is utilized due to its high-performance characteristics. The production of rubber seals, O-rings, and gaskets that are crucial for the safety and functionality of aircraft components requires a release agent that can withstand extreme conditions without compromising on environmental standards. This water based rubber release agent fulfills these requirements, providing a reliable demolding process that contributes to the longevity and durability of aerospace components.

Moreover, the Lubekote Model xxxx finds its applications in the consumer goods industry. Items such as rubber footwear, household appliances, and various rubber accessories benefit from the consistent application of this rubber mold release agent. The environmental-friendly feature of this product ensures that it is safe for use in the production of items that come in frequent contact with consumers, thus upholding a brand's reputation for quality and safety.

Support and Services:

The Rubber Mold Release Agent is designed to ensure a smooth, non-stick surface for a variety of rubber molding applications. For optimal performance, it is essential to apply the product correctly and follow all usage instructions. Should you encounter any difficulties or have questions regarding the application, storage, or handling of the product, our technical support team is here to assist you.

Our support services include guidance on product selection to match your specific molding process, troubleshooting application issues, and providing expert advice on maximizing the efficiency and lifespan of the release agent. We are committed to helping you achieve the best results with our product.

To ensure your safety and the proper use of the Rubber Mold Release Agent, please adhere to all safety data sheets (SDS) and technical data sheets (TDS) that accompany the product. If you require further assistance, our customer service team is available to provide additional support and information.

Thank you for choosing our Rubber Mold Release Agent. We are dedicated to your satisfaction and the success of your molding operations.

Packing and Shipping:

Product Packaging: Our Rubber Mold Release Agent is packaged in a durable, industrial-grade container designed to preserve the integrity of the chemical compound. Each container is tightly sealed to prevent leaks and contamination, ensuring that the product arrives in pristine condition. The label on the container provides clear instructions for storage and handling, as well as safety precautions to follow during use.

Shipping: The Rubber Mold Release Agent is classified as a chemical product and is handled with utmost care during shipping. It is packed in accordance with all applicable regulations for hazardous materials to ensure safe transportation. The product is shipped using carriers experienced in the delivery of chemical products, with tracking information provided to monitor the shipment's progress. Customers are advised to inspect the package upon arrival and report any damage immediately to our customer service team.

Warehousing and logistics

It has nearly 5,000 square meters of cargo storage area. Eight employees work full-time in warehousing.

Technical support

Making adjustment in the field

Shanghai Lorechem has a professional technical service team, whose members are specialized in polymer materials engineering. They have a wealth of field testing.

Testing in the field

Shanghai LoreChem Co., Ltd. was established in 2008. It is a high-tech enterprise which is dedicated to serve releasing products which involve semi-permanent release agent, anti-sticking, surface lubrication and thermal reactive adhesive. Shanghai LoreChem has been improving product quality for 15 years. The releasing products are mainly applied in rubber, polyurethane and composite industry. The brand of Lubekote for release agent and Thinkbond for adhesive have been registered in China. Both of them are well known in the industry.

Shanghai LoreChem 's business is all over the domestic and foreign high-end production enterprises by providing professional technical solutions and services. The company's long-term goal is to become one of the best suppliers of release agent in Asia.

Shanghai Lorechem Co., Ltd. was established in 2008. It is a high-tech enterprise which is dedicated to serve releasing products which involve semi-permanent release agent, anti-sticking, surface lubrication and thermal reactive adhesive.
