

## Liquid Adhesive Bonding Agent For Fluorine Rubber To Metal Thinkbond 93H

Our Product Introduction

for more products please visit us on [shlorechem.com](http://shlorechem.com)

### Basic Information

- Place of Origin: China
- Brand Name: Thinkbond
- Model Number: Thinkbond 93H
- Minimum Order Quantity: None
- Price: 0-99usd
- Packaging Details: 25L, 200L
- Delivery Time: 10-15 working days
- Payment Terms: T/T
- Supply Ability: 20T/month

### Product Specification

- Diluentabsolute Ethanol: Absolute Ethanol
- Application: Bonding For Fluorine Rubber To Metal
- Type: Liquid
- Classification: Chemical
- Packaging: 25L, 200L
- Chemical Resistance: Excellent
- Highlight: **Liquid Adhesive Bonding Agent,  
Fluorine Rubber To Metal Bonding Agent**

## Product Description

### Liquid Adhesive Bonding Agent for Fluorine Rubber to Metal Thinkbond 93H

#### Product Description:

Product Overview: Adhesive Bonding Agent for rubber to metal

This adhesive bonding agent is a highly versatile and reliable product that is specifically designed for rubber to metal bonding applications. It is a solvent-based chemical and is available in 25L and 200L packaging options to cater to the varying needs of different industries.

Key Attributes:

**Packaging:** 25L, 200L

**Advantage:** Environmentally friendly

**Diluent:** absolute ethanol

**Odor:** Solvent

Features:

Our adhesive bonding agent is specially formulated to provide a strong and durable bond between rubber and metal surfaces.

Benefits:

**Ensures a strong and reliable bond between rubber and metal surfaces**

**Environmentally friendly**

**Easily dilutable for customized viscosity and application**

**Minimizes the risk of bond failure and product defects**

**Provides long-lasting adhesion for improved product durability**

Conclusion:

If you are looking for a high-performance rubber to metal bonding agent, look no further. Our solvent-based adhesive bonding agent offers excellent flexibility, easy dilution, and long-lasting adhesion for a wide range of applications. Trust in our product to deliver exceptional results and improve the quality and durability of your products.

#### Features:

**Product Name:** Adhesive Bonding Agent for rubber to metal

**Classification:** Chemical

**Chemical Resistance:** Excellent

**Diluent:** Solvent

**Special suitable for** fluorine rubber to metal bonding

#### Technical Parameters:

Technical Parameter	Value
---------------------	-------

Product Name	Adhesive Bonding Agent
Odor	Solvent
Application	Bonding for rubber to metal
Chemical Resistance	Excellent
Color	Colorless or light yellow
Diluent	Solvent
Type	Liquid
Packaging	25L, 200L
Classification	Chemical
Key Features	Cost effective High performance

## Applications:

Adhesive Bonding Agent - Thinkbond

Thinkbond, a brand name of adhesive bonding agent, is a highly effective and versatile product for bonding rubber to metal. This liquid adhesive is manufactured in China with the brand name Thinkbond and model number Thinkbond, and it is available in 25L and 200L packaging options.

Thinkbond is specifically designed for rubber to metal bonding applications, making it the ideal choice for a variety of industries such as automotive, construction, and manufacturing. With its superior strength and durability, Thinkbond offers a cost effective solution for achieving strong and reliable bonds between rubber and metal surfaces.

Key Features

**High Strength:** Thinkbond is formulated to provide a strong and permanent bond between rubber and metal surfaces, ensuring long-lasting results.

**Heat Resistance:** Thinkbond can withstand high temperatures, making it suitable for applications that involve exposure to heat.

**Solvent Resistance:** The product is also resistant to solvents, ensuring that the bond remains intact in the presence of chemicals.

Diluent and Classification

Thinkbond is a liquid adhesive that requires a solvent for application. The product falls under the classification of chemical adhesives, making it a reliable and effective choice for bonding rubber to metal surfaces.

Conclusion

In summary, Thinkbond is a highly versatile and effective adhesive bonding agent that is specifically designed for bonding rubber to metal. Its high strength, water resistance, heat resistance, and solvent resistance properties make it the ideal choice for a variety of applications. With Thinkbond, you can trust that your rubber to metal bonds will be strong, durable, and long-lasting.

## Support and Services:

Adhesive Bonding Agent Technical Support and Services

Thank you for choosing our Adhesive Bonding Agent. We are committed to providing you with high-quality products and excellent technical support and services to ensure your satisfaction.

Technical Support

Our team of experienced engineers and technicians are always ready to assist you with any technical questions or issues you may have with our Adhesive Bonding Agent. We offer 24/7 technical support via phone, email, and online chat to provide you with quick and efficient solutions.

In addition, we provide on-site technical support for larger or more complex projects. Our experts will visit your site to provide hands-on assistance and ensure the optimal use of our product.

Training and Education

We understand the importance of proper training and education in achieving successful adhesive bonding results. That's why we offer training programs and workshops to help you and your team gain a deeper understanding of our products and their applications.

Our training sessions cover topics such as surface preparation, application techniques, and troubleshooting. We can also customize training programs to meet your specific needs and requirements.

Customized Formulations

If our standard Adhesive Bonding Agent does not meet your specific requirements, our team can work with you to develop a customized formulation. We have the expertise and resources to create a product that meets your unique bonding needs, ensuring maximum performance and efficiency.

Quality Assurance

We are committed to delivering the highest quality products to our customers. Our Adhesive Bonding Agent undergoes rigorous testing and quality control measures to ensure it meets the highest standards. We also provide a certificate of analysis for each batch of our product, giving you confidence in its quality and consistency.

Customer Service

We value our customers and are dedicated to providing the best possible service. Our customer service team is available to assist you with any inquiries or concerns you may have. We strive to provide timely and satisfactory solutions to ensure your complete satisfaction with our product and services.

Thank you again for choosing our Adhesive Bonding Agent. We look forward to working with you and providing you with exceptional technical support and services.

## Warehousing and logistics

It has nearly 5,000 square meters of cargo storage area. Eight employees work full-time in warehousing.

## Technical support

Making adjustment in the field

Shanghai Lorechem has a professional technical service team, whose members are specialized in polymer materials engineering. They have a wealth of field testing.

Testing in the field

Shanghai LoreChem Co., Ltd. was established in 2008. It is a high-tech enterprise which is dedicated to serve releasing products which involve semi-permanent release agent, anti-sticking, surface lubrication and thermal reactive adhesive. Shanghai LoreChem has been improving product quality for 15 years. The releasing products are mainly applied in rubber, polyurethane and composite industry. The brand of Lubekote for release agent and Thinkbond for adhesive have been registered in China. Both of them are well known in the industry.

Shanghai LoreChem 's business is all over the domestic and foreign high-end production enterprises by providing professional technical solutions and services. The company's long-term goal is to become one of the best suppliers of release agent in Asia.
