

Cold And Hot Water Resistance CPU Adhesive Bonding Agent 25L 200L Packaging

Our Product Introduction

for more products please visit us on shlorechem.com

Basic Information

- Place of Origin: China
- Brand Name: Thinkbond
- Model Number: Thinkbond 946
- Minimum Order Quantity: None
- Price: 0-99usd
- Packaging Details: 25L, 200L
- Delivery Time: 10-15 working days
- Payment Terms: T/T
- Supply Ability: 20T/month

Product Specification

- Name: Adhesive/Bonding Agent For CPU
- Advantage: Good Resistance Of Cold And Hot Water
- Application: CPU Bonding
- Odor: Solvent
- Type: Liquid
- Diluent: Solvent
- Packaging: 25L, 200L
- Highlight: **25L CPU Bonding Adhesive Agent, Hot Water Resistance CPU Adhesive, Cold Water Resistance Adhesive Bonding Agent**

Product Description

Good Resistance of Cold and Hot Water Adhesive/Bonding Agent for CPU Thinkbond 946

Product Description:

Adhesive Bonding Agent

Type: Liquid

Odor: Solvent

Classification: Chemical

Diluent: Solvent

Adhesive Bonding Agent is a universal bonding agent designed for various industrial applications.

With its excellent adhesion properties, this chemical adhesive is perfect for bonding different materials such as cpu to metal. It has a good resistance to both hot and cold water, ensuring a long-lasting bond even in extreme conditions.

Adhesive Bonding Agent has high tensile strength, making it a reliable choice for industrial bonding needs. It can withstand high levels of stress and pressure without compromising its bond, providing a strong and durable hold.

Not only does this bonding agent offer exceptional bonding strength, but it also has a high level of flexibility. This allows it to adapt and move with the bonded materials, preventing any cracks or breaks in the bond.

As a liquid adhesive, Adhesive Bonding Agent is easy to apply and can be used on various surfaces. Its solvent diluent ensures that it spreads evenly and dries quickly, reducing the overall bonding time and increasing efficiency.

In summary, Adhesive Bonding Agent is a top-of-the-line chemical adhesive that offers universal bonding capabilities, good resistance to water, high tensile strength, and excellent adhesion. Its flexibility and ease of use make it a go-to choice for industrial bonding needs. Try it now and see the outstanding results for yourself!

Features:

Product Name: CPU Adhesive/Bonding Agent

Application: Industrial Bonding

Chemical Resistance: Excellent

Type: Liquid

Packaging: 25L, 200L

Cost Effective

CPU to Metal Bonding Agent

Excellent Adhesion

Technical Parameters:

Product Name	Adhesive Bonding Agent
Packaging	25L, 200L
Application	CPU Bonding
Type	Liquid
Classification	Chemical

Diluent	Solvent
Flexibility	High
Odor	Solvent
Chemical Resistance	Excellent
Key Features	CPU to metal bonding agent, dilutable

Applications:

Adhesive Bonding Agent - Thinkbond

Model Number: Thinkbond 946

Place of Origin: China

Thinkbond is a high-performance adhesive bonding agent designed and produced in China. It is specifically formulated for bonding rubber to metal in various industrial applications.

Application: Bonding

Thinkbond is the perfect solution for bonding cpu to metal in industrial settings. It provides excellent adhesion performance, making it suitable for use in a wide range of bonding applications.

Packaging: 25L, 200L

Thinkbond is available in two convenient packaging sizes - 25L and 200L. This allows for easy handling and storage, making it a practical choice for industrial use.

Odor: Solvent

Thinkbond has a solvent-based formula, which gives it a noticeable odor. However, this odor dissipates quickly after application, making it safe and convenient to use in industrial environments.

Chemical Resistance: Excellent

Thinkbond offers excellent chemical resistance, making it suitable for use in industries where exposure to harsh chemicals is common. It can withstand a wide range of chemicals, ensuring a strong bond between cpu and metal.

Flexibility: High

Thinkbond is highly flexible, allowing it to accommodate for any movement or expansion in the bonded materials. This makes it ideal for use in industrial applications where flexibility is crucial.

High Temperature Bonding

One of the main advantages of Thinkbond is its ability to bond cpu to metal at high temperatures. This makes it a top choice for industries such as automotive and construction, where high temperatures are often present.

Cost Effective

Thinkbond is a cost-effective solution for bonding cpu to metal. Its excellent adhesion performance and high temperature resistance eliminate the need for frequent repairs or replacements, saving both time and money for industrial businesses.

Industrial Applications

Thinkbond is suitable for a wide range of industrial applications, including cpu to metal bonding in automotive, construction, and manufacturing industries. It provides a strong and reliable bond, ensuring the durability of the finished products.

Automotive Industry

In the automotive industry, Thinkbond is commonly used for bonding cpu components to metal frames, such as in the production of car doors, windows, and seals. Its high temperature resistance and flexibility make it a top choice for this industry.

Construction Industry

The construction industry also benefits from the use of Thinkbond for bonding cpu to metal in various applications, including in the production of windows, doors, and other building components. Its high chemical resistance and flexibility make it a reliable choice for this industry.

Overall, Thinkbond is a versatile and reliable adhesive bonding agent that offers excellent adhesion performance, high temperature resistance, and cost-effectiveness. Its applications in various industries make it a valuable product for any industrial business looking for a strong and durable bonding solution.

Customization:

Thinkbond Adhesive Bonding Agent Customization Service

Product Attributes:

Brand Name: Thinkbond

Model Number: Thinkbond 946

Place of Origin: China

Type: Liquid

Chemical Resistance: Excellent

Application: Bonding

Diluent: Solvent

Classification: Chemical

Thinkbond Adhesive Bonding Agent is a high-quality liquid adhesive designed for industrial use. With its excellent chemical resistance and fast drying formula, it is the perfect solution for all your bonding needs.

Customization Services:

At Thinkbond, we understand that each customer has unique needs and requirements. That's why we offer customizable services for our Adhesive Bonding Agent. Our team of experts will work closely with you to create a product that meets your specific requirements and delivers the best results for your application.

Key Features:

Good resistance to cold and hot water

Specifically formulated for CPU to metal bonding

Fast drying for quick and efficient application

Our Adhesive Bonding Agent is specially designed to provide excellent resistance to both cold and hot water. This makes it suitable for use in various environments and applications where exposure to water is expected. Additionally, it is specifically formulated for CPU to metal bonding, ensuring strong and durable bonds.

The fast drying formula of our Adhesive Bonding Agent allows for quick and efficient application, saving you time and increasing productivity. With its high-performance capabilities and customizable services, Thinkbond Adhesive Bonding Agent is the perfect choice for all your bonding needs.

Choose Thinkbond for reliable and high-quality adhesive solutions. Contact us today to learn more about our Adhesive Bonding Agent customization services.

Support and Services:

Technical Support and Services for Adhesive Bonding Agent

Welcome to our technical support and services page for Adhesive Bonding Agent. We are committed to providing our customers with the best possible experience when using our product, and we are dedicated to helping you achieve successful and long-lasting adhesive bonding results.

Product Information and Resources

Our technical support team is available to assist you with any questions or concerns you may have about Adhesive Bonding Agent. We also offer a variety of resources to help you better understand our product and its capabilities, including:

Product specifications and data sheets

Application guides and instructional videos

Frequently asked questions

Technical support hotline and email contact

Customized Solutions

We understand that every adhesive bonding project is unique and may require a customized solution. Our team of experts is available to work with you to develop a tailored plan that meets your specific needs and ensures the best results.

Training and Education

We are committed to helping our customers achieve the highest level of success with Adhesive Bonding Agent. That's why we offer comprehensive training and education programs for both beginners and experienced users. Our training sessions cover topics such as proper application techniques, safety precautions, and troubleshooting tips.

Quality Assurance

At Adhesive Bonding Agent, we pride ourselves on the quality of our product. Our team performs rigorous quality control checks to ensure that each batch of our product meets the highest standards. If you encounter any issues with our product, please do not hesitate to contact us for assistance.

Customer Support

We value our customers and strive to provide the best support possible. Our customer support team is available to answer any questions or concerns you may have about our product or services. We are dedicated to ensuring your satisfaction and success with Adhesive Bonding Agent.

Thank you for choosing Adhesive Bonding Agent. We are confident that with our technical support and services, you will achieve exceptional results in your adhesive bonding projects. Please do not hesitate to contact us for any further assistance or inquiries.

Warehousing and logistics

It has nearly 5,000 square meters of cargo storage area. Eight employees work full-time in warehousing.

Making adjustment in the field

Shanghai Lorechem has a professional technical service team, whose members are specialized in polymer materials engineering. They have a wealth of field testing.

Testing in the field

Shanghai LoreChem Co., Ltd. was established in 2008. It is a high-tech enterprise which is dedicated to serve releasing products which involve semi-permanent release agent, anti-sticking, surface lubrication and thermal reactive adhesive. Shanghai LoreChem has been improving product quality for 15 years. The releasing products are mainly applied in rubber, polyurethane and composite industry. The brand of Lubekote for release agent and Thinkbond for adhesive have been registered in China. Both of them are well known in the industry.

Shanghai LoreChem 's business is all over the domestic and foreign high-end production enterprises by providing professional technical solutions and services. The company's long-term goal is to become one of the best suppliers of release agent in Asia.
