Product Description

Efficient Internal Mold Release Agent with Lubricant Properties for Polyester/Epoxy/Phenolic/Acrylic Resins

It is a very efficient internal release agent with lubricant properties, formulated for polyester- epoxy- phenolic- and acrylic resins .

It is free of silicones. Due to its chemical consistency it allows for post- treatment after release such as painting or foaming on top of the created surface without any additional treatment such as sanding.

It will achieve a more water resistant surface of the produced parts.

Properties:

State: liquid, clear

Density: 0.97-1.03 g/cm³

Shelf life: 12 months

Advantages:

Easy to use

Environmental friendly

Prevents build up on the molds

Excellent anti-tack agent for rubber hose

Non greasy, non contaminating coating

Excellent performance of produced parts

Excellent release properties

Application:

Molds should be clean before using.

Apply a thin coat of our release agent.

Wait until the water is evaporated.

Technical support

Making adjustment in the field

Shanghai Lorechem has a professional technical service team, whose members are specialized in polymer materials engineering. They have a wealth of field testing.

Testing in the field

Shanghai LoreChem Co., Ltd. was established in 2008. It is a high-tech enterprise which is dedicated to serve releasing products which involve semi-permanent release agent, anti-sticking, surface lubrication and thermal reactive adhesive. Shanghai LoreChem has been improving product quality for 15 years. The releasing products are mainly applied in rubber, polyurethane and composite industry. The brand of Lubekote for release agent and Thinkbond for adhesive have been registered in China. Both of them are well known in the industry.

Shanghai LoreChem's business is all over the domestic and foreign high-end production enterprises by providing professional technical solutions and services. The company's long-term goal is to become one of the best suppliers of release agent in Asia.
