

## Solvent Based Rubber Hard Cord Hose Mold Release Agent Lubricant

Our Product Introduction

for more products please visit us on [shlorechem.com](http://shlorechem.com)

### Basic Information

- Place of Origin: China
- Brand Name: Lubekote
- Model Number: 9068
- Minimum Order Quantity: None
- Price: 0-99usd
- Packaging Details: 20L, 200L
- Delivery Time: 10-15 working days
- Payment Terms: T/T
- Supply Ability: 20T/month

### Product Specification

- Advantages: Minimum Build Up
- Product Form: Liquid
- Chemical Resistance: Excellent
- Type: Rubber Release Agent
- Package: 20L, 200L
- Storage Conditions: Store In A Cool, Dry Place
- Advantage: Stronge Release Power, Perfect For Hard Core Hose
- Highlight: **Solvent Based Rubber Mold Release Agent ,  
Lubricant Rubber Mold Release Agent**

## Product Description

### Product Description:

Lubekote 9026 is a solid activator dispersion solvent lubricant/release agent, with low friction and excellent release anti-stick properties, the release agent has a dry colorless coating, mainly used in rubber hose and other rubber products, with good lubrication and core removal effect

Good lubrication performance, easy to remove the core; Reduce the inner wall of the hose residue, cleaner than silicone oil, can replace silicone oil; There are no pits.

### Features:

Product Name: Rubber Hose Release Agent

Package: Available in 20L and 200L containers

Type: Rubber Release Agent

Advantages: Excellent release performance

Chemical Resistance: Offers Excellent durability

Formulation: Solvent Based Rubber Release Agent

### Technical Parameters:

Type	Rubber Hose Release Agent
Compatibility	Compatible With Most Rubber Materials
Advantages	Minimum Build Up, excellent release power, perfect for hard core hose
Package	20L, 200L
Product Form	Liquid
Storage Conditions	Store In A Cool, Dry Place

### Applications:

For the best release results, the mold surface should be cleaned and dried first, and all previously used trace release agents should be cleaned.

Lubekote 9068 should be stirred before or during use, and the usual brushing methods can be used, such as spraying, dipping, rubbing. For new mandrel, two coats should be applied and release agent should be applied in each cycle thereafter.

The original solution can be used directly, sprayed or rubbed

### Support and Services:

The Rubber Mold Release Agent is designed to provide efficient and reliable release performance for rubber manufacturing processes. Our product ensures a smooth release of molded parts, minimizing defects and enhancing overall productivity. To maintain the efficacy of the Rubber Mold Release Agent and support our customers, we offer comprehensive technical support and services.

Our technical support includes:

Guidance on proper application techniques to maximize the performance of the release agent.

Troubleshooting assistance for any challenges encountered during the molding process.

Tips for storage and handling to preserve the quality and effectiveness of the product.

Recommendations for cleaning and maintaining the molds to prevent buildup and ensure consistent release.

In addition to technical support, we provide the following services:

Product training sessions for teams to ensure correct usage and safety.

Customized consultations to address specific needs and improve molding processes.

Access to material safety data sheets (MSDS) and technical data sheets (TDS) for in-depth product information.

Regular updates on product enhancements and new formulations to keep your operation up-to-date.

We are committed to delivering not only a superior product but also the support and services necessary to achieve the best results in your rubber molding operations.

### Packing and Shipping:

**Product Packaging:** The Rubber Mold Release Agent is packaged in a high-quality, industrial-grade container ensuring a secure seal to maintain product integrity. The container is designed for easy use and storage, with clear labeling including product name, usage instructions, and safety information. Each container is carefully inspected before packaging to ensure it meets our strict quality standards.

**Shipping:** Our Rubber Mold Release Agent is shipped with utmost care to ensure it reaches our customers in perfect condition.

Containers are packed in sturdy boxes with appropriate cushioning materials to prevent any movement during transit. The shipment is labeled as a chemical product, with all necessary hazard and handling information prominently displayed. We ensure that all our shipments comply with local and international shipping regulations to provide a smooth and safe delivery to your location.

## Warehousing and logistics

It has nearly 5,000 square meters of cargo storage area. Eight employees work full-time in warehousing.

## Technical support

Making adjustment in the field

Shanghai Lorechem has a professional technical service team, whose members are specialized in polymer materials engineering. They have a wealth of field testing.

Testing in the field

Shanghai LoreChem Co., Ltd. was established in 2008. It is a high-tech enterprise which is dedicated to serve releasing products which involve semi-permanent release agent, anti-sticking, surface lubrication and thermal reactive adhesive. Shanghai LoreChem has been improving product quality for 15 years. The releasing products are mainly applied in rubber, polyurethane and composite industry. The brand of Lubekote for release agent and Thinkbond for adhesive have been registered in China. Both of them are well known in the industry.

Shanghai LoreChem 's business is all over the domestic and foreign high-end production enterprises by providing professional technical solutions and services. The company's long-term goal is to become one of the best suppliers of release agent in Asia.

Shanghai Lorechem Co., Ltd. was established in 2008. It is a high-tech enterprise which is dedicated to serve releasing products which involve semi-permanent release agent, anti-sticking, surface lubrication and thermal reactive adhesive.
