Product Description

Water Based Medical Rubber Plug Release Agent Perfect surface

Release agent for medical rubber plug is a key material used in the production process of medical plug. Its main function is to form a layer of functional substance between the mold and the finished product to ensure smooth release of the plug while keeping the surface smooth and clean.

Our Lubekote release agent is water based. It is widely used in the production process of medical rubber plugs to ensure the quality and surface finish of rubber plugs, and is suitable for the manufacturing needs of various medical rubber plugs

Use the original liquid first, and then use the 0.3mm caliber spray gun 4-6 hours to fill once, the demoulding effect is very good, the product surface and the mold surface are very excellent.

Product features:

Environmentally friendly and safe
Excellent demoulding performance, good demoulding durability
Easy to use
Excellent plug surfaces

Handling precautions:

For industrial use only.

Making adjustment in the field

Shanghai Lorechem has a professional technical service team, whose members are specialized in polymer materials engineering. They have a wealth of field testing.

Testing in the field

Shanghai LoreChem Co., Ltd. was established in 2008. It is a high-tech enterprise which is dedicated to serve releasing products which involve semi-permanent release agent, anti-sticking, surface lubrication and thermal reactive adhesive. Shanghai LoreChem has been improving product quality for 15 years. The releasing products are mainly applied in rubber, polyurethane and composite industry. The brand of Lubekote for release agent and Thinkbond for adhesive have been registered in China. Both of them are well known in the industry.

Shanghai LoreChem's business is all over the domestic and foreign high-end production enterprises by providing professional technical solutions and services. The company's long-term goal is to become one of the best suppliers of release agent in Asia.
